## Dogs Trust Ballymena Northern Ireland

This scheme involved reconfiguring the existing centre and construction on a new intake block of 20 kennels, vet suite and food prep facilities including a new puppy block with reconfigured exercise paddocks. Also the redevelopment of adjacent land for a new standalone rehoming centre. The new centre will allow public access to 14 kennels and training facilities with 3 specialist training/ sponsored dog kennels, office space and large exercise paddocks. The brief was to ensure the centre offered a modern and state of the art facility to the community of Ballymena and the wider catchment of Northern Ireland.
