

## Central Office Accommodation & County Library

Mid Devon District Council

The project involved the consolidation of a number of the council departments, currently housed in various buildings around the town, into one building on a riverside site on the southern edge of the town centre.

In addition, the council has taken the opportunity to provide a new county Library facility within the new building occupying approximately 7,000 sq ft out of the total building area of approximately 50,000 sq ft.

Construction commenced in April 2002 with completion in December 2003 and in November 2002 we achieved a BREEAM rating of "Very Good" for this project.
